Haemorrhoids are swollen veins in the anus and rectum. They can be caused by a variety of factors, including pregnancy, childbirth, chronic constipation, and straining during bowel movements. Haemorrhoids can be painful, itchy, and bleeding. While there are a number of conventional treatments for haemorrhoids, many people prefer to try natural remedies first.

Natural Treatments for Haemorrhoids

There are a number of natural treatments that can help to relieve the symptoms of haemorrhoids. These include:

1. **Sitz baths:** Sitz baths are warm baths that can help to soothe the pain and inflammation of haemorrhoids. To take a sitz bath, fill a bathtub

with warm water and sit in it for 15-20 minutes. You may add epsom salts or baking soda to the water to help reduce swelling.

2. **Witch hazel:** Witch hazel is a natural astringent that can help to shrink haemorrhoids. To use witch hazel, apply it to a cotton ball and gently dab it on the affected area. You may also add witch hazel to a sitz bath.
3. **Aloe vera:** Aloe vera is a natural anti-inflammatory that can help to soothe the pain and itching of haemorrhoids. To use aloe vera, apply it to a cotton ball and gently dab it on the affected area. You may also add aloe vera to a sitz bath.
4. **Tea tree oil:** Tea tree oil is a natural antiseptic that can help to kill bacteria and reduce inflammation. To use tea tree oil, add a few drops to a sitz bath or apply it to a cotton ball and gently dab it on the affected area.
5. **Lifestyle changes:** There are a number of lifestyle changes that can help to prevent and treat haemorrhoids. These include:
 - Eating a healthy diet that is high in fiber and low in processed foods
 - Getting regular exercise
 - Avoiding straining during bowel movements
 - Managing stress

When to See a Doctor

If you have haemorrhoids that are severe or do not respond to home treatment, it is important to see a doctor. Your doctor may recommend surgery to remove the haemorrhoids.

Haemorrhoids are a common problem, but they can be treated effectively with natural remedies. By following the tips in this article, you can find relief from the pain and discomfort of haemorrhoids.

VEJTHANI

Long-term untreated **HEMORRHOIDS**

can lead to a risk of recurrence

The diagram illustrates the internal structure of hemorrhoids within the rectal wall. Four callout boxes point to specific features:

- Tends to have rectal bleeding
- Visible from the outside and the prolapsed hemorrhoid cannot be pushed back inside
- At risk of infections and complications
- May have discharge or mucus

If hemorrhoid at an early stage is left over time and not treated properly, a chance of inflammations and recurrence arise.

How to Take a Sitz Bath in a Tub

- Clean the tub.
- Fill the tub with 2 to 3 inches of warm water.
- While in tub, lean backwards so the water can reach the entire area.
- Remain in the tub for 10 to 15 minutes, drain the water, and pat yourself dry.
